

Greetings Students,

To all of our incoming Freshmen and to our returning students, we are excited that you have chosen Wallace Community College Selma to provide your educational training needs. Classes will begin on August 24, 2020. Most of the instruction for the classes this Fall session will be administered online for academic courses and for the theory components of technical courses and health science courses. The time that is noted on the course schedule indicates the times that virtual class meeting will take place for your courses. In addition, face-to-face hands-on instruction will be held for some lab-based courses, clinical/lab courses for health science and technical programs. The dates and times scheduled for labs and clinical classes on campus will be noted in course syllabus and in your CANVAS online course shell. If you are enrolled in remedial, technical or health science courses, please refer to your online course shell and your instructor for additional specific details about the face-to-face lab requirements for your course.

Know that we have been anticipating and planning for your arrival for several months. While some of our strategies and methods for providing educational services may look a little different this semester, the WCCS Faculty and Staff is committed to providing a student-centered teaching and learning environment which adheres to safety protocols that align with the most recent Center for Disease Control guidelines. All precautions will be taken to ensure social distancing during labs and personal protection supplies will be available for students who will be attending labs on campus.

Again, thank you for your patience and cooperation as we work together to ensure that we provide a safe, flexible, and productive learning environment for you.

Tammie Briggs, Dean of Instruction  
Raji Gourdine, Dean of Technical Programs & Workforce Development
