**SUMMARY FINDINGS:**

- Of units reporting, 94% have goal statements that align with the mission of the College, identify who the unit serves as well as its primary function.
- 94.11 % of outcomes were measurable and supports the College's mission
- 100% of assessment measures addressed the outcome and provided measurable results. 58.82 % of this number also had adequate data for analysis
- 70.57 % of units had aggregated results for the majority of outcomes. Of this number, 23.52% had aggregated results for all outcomes and a plan to address weaknesses
- 52.94 % of units used data findings to make decisions for improvement that included an action plan, timeline and responsible party. Of this number 26.47% also established an estimated cost for the improvement plan
- 85.29% of units utilized summary findings to close the loop on assessment plans from the previous year.

**USE OF RESULTS:**

- The office of Institutional Effectiveness & Research will provide individualized feedback to each unit based on the findings of the assessment committee and the office of IER.
- All plans with areas of developing will be required to work with the office of IER to improve the plan and resubmit for evaluation.
- Individualized attention was given to discussing and reviewing all areas of the IEP where units were not performing exemplary.
- Unit outcome data was linked to the College's goals and SACSCOC Principles of Accreditation to generated appropriate reports in SPOL.
- The College's goal analysis map was updated based on data findings and used to identify areas requiring additional assessment outcomes.
